

ENVIRONMENTAL

Fun, carefree, and a lover of nature, the Environmental Bride loves all things natural. A simple silhouette made of lightweight, comfortable fabrics is the signature of this type of bride. Her dress is simple and unique and is indicative of her down-to-earth personality. Tending to stay away from embellishments, any type of design present on her dress is somewhat camouflaged using tone on tone coloration. She adorns herself with minimal jewelry made from recycled gold and diamonds.
